

# File Download Tracker – Product Sheet

2017-02-13

## Track Downloads by Registered Users

If you want to keep track of downloads from your website, have visitors to your website register before downloading files and collect the statistics.

The File Download Tracker allows you to list files from a folder in the media archive as downloadable links on a page and require registration via a form when the user clicks the link the first time and deny downloads without registration.

Cafe Europa
- [Canalboat and boat rental at Christianshavn canal](#)  
Copenhagen: On a sunny day one of the best things to do in Copenhagen is to take a canal boat around the

### Registration Form

Name\*

E-mail\*

The File Download Tracker keeps track of all the file downloads and you can view the statistics in a report in the CMS Console or export it into an Excel spreadsheet.

Normally, the user is required his name and email address for the registration; however, you can extend the registration form with more pre-defined fields such as the company name or job title.

If necessary, you can set up to get email notifications on each file download.

## Features

The following are major features of the File Download Tracker add-on:

- Registered downloads
- Adaptable registration form
- Both new and existing links
- Download tracking
- Download reports
- Email notifications

## Registered downloads

Register

Want users to supply their email addresses and names before downloading files from your website?

The File Download Tracker exposes links to the files in the media archive so that the users should fill out and submit a registration form to download the files.

If the user has not registered, he or she will be denied access to the file.

## Adaptable registration form

Do you need more information about the users along with the email address and name?

In just a few clicks you can extend your form with other standard fields of a registration form.

You can also choose which field should be required and optional.

The screenshot shows a 'Downloads' page with a list of links on the left and a 'Registration Form' on the right. The form includes fields for Name\*, Job Title, Company Name, E-mail\*, Phone Number, and Country, each with a placeholder text 'Enter [field name]'. A 'Register' button is at the bottom of the form.

## Both new and existing links

The screenshot shows the C1 CMS interface with a 'CONTENT' tab selected. Below the tab, there are buttons for 'B', 'I', 'CODE', 'T-', and a list of icons. A dropdown menu is open, showing options: '(Default)', '(Text)', '(None)', 'Insert', and 'Paste'. Below this, there is a section titled 'The guides to get you started in Composite C1:' with links to 'Composite C1 User Guide', 'A Guide to C1 Functions', 'A Guide to Data Types in Composite C1', and 'A Guide to C1 Console Applications'. At the bottom, there is a button 'Auto Register All' and a text box containing: 'Exposes files from a page for downloads allowed only after a user registration. Notification Email = info@fabrikam.com FormIntro = ...'.

Do you already have links on web pages you want to turn into the ones that require registration, too?

With the File Download Tracker you can both create new list of download links with mandatory registration and control access to the existing links via the registration quickly and easily.

## Download tracking

Do you want to know everything about download activities of each user on your website?

The File Download Tracker keeps track of the files downloaded, users who download them, pages they are downloaded from and the date and time of these downloads.

Wondering about file download statistics?

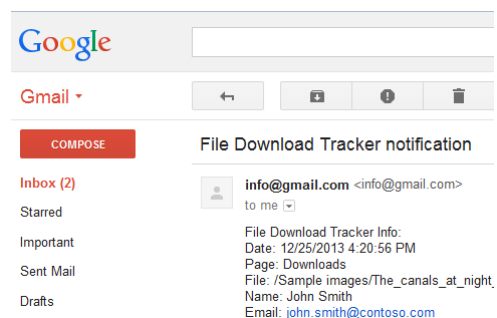

The File Download Tracker provides you with a report on the download activities on your website right in the CMS Console.

You can also export the statistics to an Excel spreadsheet.

## Email notifications

Are you interested in getting notified by email each time a new user registers for downloads on your website?

If your website can send emails, just specify your email address, and you will be timely notified of the new registrations.

## Price Information

You can get the File Download Tracker add-on as a part of one of the C1 CMS service plans.

For information about the plans, please see <http://c1.orchestra.com/Plans>.
